WORK EXPERIENCE

Internet LAVA, Houston TX   2013 October - present
Web Developer and Database Administrator
- Solely develops and maintains all the client websites and special project websites *(examples can be found on my portfolio website)*

- Project Management Tool - Improved and upgraded the existing company's project management tool. Additional features such as task assignment, user accounts and roles, and user management were added.
- www.lawyerlegion.com – A website directory of lawyers all throughout United States. It was a team work and I mostly handled the database.
    - Collected and organized data
    - Handled the database, imported huge amount of data
    - Coded out the responsive design

Chikka Asia, Inc., Pasig City, Philippines   2011 April - May
Web Developer Intern

- Created a web administrator tool that would enable the user to easily debug the social networking site that the company was working on
- This tool was used to monitor the activities within that social networking site

University of the Philippines, Quezon City, Philippines   2011 June – 2012 April
College Thesis: *Automated Cardiac Function and*
Disease Assessment by Analyzing Echocardiography Images

- Worked on a software that automates the measurement of Left Ventricle for more precise and accurate results
- Collaborated with the doctors and cardiologists of the Philippine General Hospital (PGH)
